Hardy Shrubs and Plants Seeds, Bulbs

MMUCH of the success which A. Washburn & Sons has had, comes from the feeling of thorough confidence on the part of their patrons. For years many of our present customers have bought their seeds, bulbs, plants and shrubs from us and to lose the confidence of our former patrons would mean that we would have to make practically a new start in business.

This is only one of the reasons why we exercise the utmost of care in having all our seeds, plants and shrubs true to name and reliable. So although we give no guarantee in any way as to the successful growing of a crop, because of the numerous conditions which enter in other than the quality of our product, we do say that a person planting our goods and giving them proper care is very reasonably certain of having a satisfactory return.

This year our seeds and other products are fully up to the standard of former years and any one purchasing from us is absolutely certain that what he buys is what we say it is.

We solicit your inquiries for suggestions in landscape improvement and any correspondence will be handled by men having a complete knowledge of the nursery business. Our nursery and greenhouses are open to visitors at all times except Sundays.

Our terms are cash with order. Payment is preferred by bank draft, postal or express money order. Stamps of two cent denomination will be accepted for small amounts.

We hope that we may have a share of your patronage.

2-3 ft. 35c each, \$3.50 per doz.

HAMAMELIS

H. Virginica Witch Hazel 15-25 Oct. Small yellow flowers.

4 ft. 75c each.

HYDRANGEA

H. paniculata gr. 6-8 Aug. A very hardy shrub producing immense panicles of white flowers. Severe pruning each spring will tend to increase the size of the flowers.

1½-2 ft. 35c each, \$3.50 per doz.

A WELL ARRANGED PLANTING

Good Shrubs Lose a Large Part of Their Value if Not Properly Placed

LIGUSTRUM, PRIVET

L. Amurense Amoor River Privet 8-10. Dark green foliage, upright habit of growth. Much the best variety for this section on account of its extreme hardiness, standing our severest winters without freezing back. An excellent hedge plant. For hedges, plant 12 to 15 in. apart.

3 ft. 25c each, \$2.50 per doz.
\$18.00 per 100.

L. Regelianum Regel's Privet 5-6 ft. June. A beautiful shrub of half drooping habit and one of the best for planting in the border. An excellent variety for a hedge where formal trimming is not wanted. White flowers in June followed by black berries.

2-3 ft. 50c each, \$5.00 per doz.

LONICERA, HONEYSUCKLE

L. Morrowi Morrow's Honeysuckle 6-8 May. A rapid growing shrub with dark green foliage. Small white flowers followed by red fruit.

3 ft. 35c each, \$3.50 per doz.

L. tartarica Bush Honeysuckle 8-10 May. An upright growing shrub producing pink flowers followed by red or orange berries. Useful for border planting and an excellent shrub to use for a tall hedge.

3-4 ft. 35c each, \$3.50 per doz.

L. tartarica var. alba

Similar to above except in color of flowers which are white.

3-4 ft. 35c each, \$3.50 per doz.

LYCIUM Matrimony Vine 4-5 June-Sept.

A rapid growing plant of a rather drooping habit, sometimes classed as a vine. Small purple flowers followed by red fruit. Very hardy and will grow almost anywhere.

3-4 ft. 35c each, \$3.50 per doz.

PHILADELPHUS, MOCK ORANGE OR SYRINGA

P. Coronarius 9-12 May. One of the old garden favorites. White flowers.

2-3 ft. 35c each, \$3.50 per doz.

4-5 ft. 50c each, \$5.00 per doz.

PRUNUS

P. japonica Flowering Almond 4-5 April. A fine shrub producing beautiful pink flowers before most shrubs leaf out.

3-4 ft. 50c each, \$5.00 per doz.

P. Pissardi Purple Leaf Plum. A small tree having dark purple foliage and holding the color well during the summer.

4-5 ft. 75c each.

RHODOTYPUS

R. kerrioides White Kerria 8-10 May. One of the most desirable shrubs, having light green leaves shaped somewhat like an elm leaf. Single white flowers followed by black berries. One of the most satisfactory shrubs in our list.

2-3 ft. 35c each, \$3.50 per doz.

RHUS

R. cotinus Smoke Tree 12-15 July. An old favorite having very pretty foliage. The peculiar thread-like flowers, at a little distance, have an appearance not unlike smoke.

3-4 ft. 50c each, \$5.00 per doz.

R. glabra Common Sumac 8-10. Fine for producing natural effects.

4-5 ft. 50c each, \$5.00 per doz.

6-8 ft. 75c each.

R. typhina Staghorn Sumac 15-25. A beautiful variety of the sumac and useful for planting at the back of a border.

4-5 ft. 50c each, \$5.00 per doz.

RIBES

R. aureum Missouri Flowering Currant 6-8 May. A very desirable shrub producing golden yellow flowers. Pretty foliage.

2-3 ft. 35c each, \$3.50 per doz.

3-4 ft. 50c each, \$5.00 per doz.

ROSA

R. blanda Meadow Rose 5-6 June. A beautiful single pink rose which produces the red seed pods very freely. Dark green foliage, red stems during winter season.

2-3 ft. 35c each, \$3.50 per doz.

R. multiflora Japanese Wild Rose 4-5 June. A rapid grower and a good dwarf climber, but more often used as a shrub. Dark green foliage and a mass of single white flowers during the blooming season.

2-3 ft. 35c each, \$3.50 per doz.

R. rubiginosa Sweet Brier Rose 5-6 June. A rose with fragrant foliage. Flowers bright pink.

3-4 ft. 50c each, \$5.00 per doz.

R. rubrifolia Red-leaved Rose 5-6 June. An upright bush having purplish red foliage and beautiful small single, pink flowers. The red hips or seed pods are produced in great numbers and make this variety of rose an especially good one to plant in combination with the Snowberry.

3-4 ft. 50c each, \$5.00 per doz.

Rosa rugosa Japanese Rose 5-6. Beautiful dark green, crinkled foliage make this rose quite different from the others listed. The pink flowers measure two to three inches in diameter and are produced in limited number during the summer. The flowers are followed by red seed pods which are often an inch or more in diameter.

1½-2 ft. 35c each, \$3.50 per doz.

R. setigera Illinois Rose 5-6 June. One of the most beautiful roses for natural planting. The flowers are about 1½ to 2 inches in diameter and of a most pleasing shade of pink. A very hardy variety, seldom infested with aphids or mildew, and should be planted in large numbers. Can be effectively trained to cover posts or fences. Highly recommended by Prof. Wilhelm Miller of the landscape department of the State University.

1½-2 ft. 35c each, \$3.50 per doz.

For Tea and Climbing Roses see page 27.

SAMBUCUS

S. canadensis Common Elder 15-20 June-July. A useful shrub to plant for a background or in moist locations.

3-4 ft. 35c each, \$3.50 per doz.

S. nigra aurea Golden Elder 12-20 June-July. A showy plant having golden foliage. Useful for a border but not desirable for foundation planting. Must have full sun or foliage will not color well.

3-4 ft. 50c each, \$5.00 per doz.

SPIREA

S. Anthony Waterer Waterer's Spirea 2-3 June to Sept. One of the most desirable dwarf shrubs. Crimson flowers produced in large flat clusters in June and smaller clusters from July to frost.

15-18 inches. 35c each, \$3.50 per doz.

S. Billardi Billard's Spirea 5-6 July to Sept. An upright growing shrub with the branches topped with plume-shaped clusters of pink flowers.

4-5 ft. 50c each, \$5.00 per doz.

S. opulifolia Ninebark 8-10 June. One of the best of the tall growing spireas. Lantana like clusters of white flowers followed by attractive seed pods.

3-4 ft. 50c each, \$5.00 per doz.

S. sorbifolia Ash Leaved Spirea 5-8 July-Aug. Large pyramidal-shaped spikes of white flowers with interesting seed vessels later. A beautiful variety and quite distinct from the others listed.

2-3 ft. 50c each, \$5.00 per doz.

S. Thunbergii Japanese Spirea 3-5 May. A mass of small white flowers during blooming season. Fine yellowish green foliage.

1½-2 ft. 35c each, \$3.50 per doz.

S. Van Houttei Bridal Wreath 6-8 May. Familiar to every one. Perhaps the most generally satisfactory shrub in our whole list. Small clusters of verberna-like white flowers almost entirely hiding the foliage. Our stock of the shrub is large and of extra quality.

2½-3 ft. 35c each, \$3.50 per doz.

SYMPHORICARPUS

S. racemosus Snowberry or Waxberry 5-6 June-Aug. Small pink flowers followed by waxy white berries which last well into the fall.

2-3 ft. 35c each, \$3.50 per doz.

S. vulgaris Indian Currant or Coral Berry 4-5. Flowers not important but small purplish red berries are produced in great profusion and make the bushes very attractive.

2-3 ft. 35c each, \$3.50 per doz.

SYRINGA, LILAC

S. persica Purple Persian Lilac 9-12 May. One of the best of the many varieties of lilac. Slender, graceful stems and rich green foliage. Flowers, light lavender.

3-4 ft. 50c each, \$5.00 per doz.

blue berries. Foliage bronzy green in the spring and coloring nicely in the fall.

3-4 ft. 50c each, \$5.00 per doz.

V. opulus High Bush Cranberry 9-12 June. An excellent shrub and one that should be in every collection. White flowers followed by bright red berries which remain on well into the winter.

2-2 1/2 ft. 35c each, \$3.50 per doz

V. sterilis Snowball 10-12 May. A shrub that is found in almost all of the older gardens. Large round clusters of white flowers from which it derives its name.

3 ft. 35c each, \$3.50 per doz.

35c each, \$3.50 per doz.

CLEMATIS

C. Jackmani The most popular of the large flowered varieties of clematis. Rich purple flowers about three inches in diameter. A little hard to get established, but quite hardy when once well started.

50c each, \$5.00 per doz.

C. paniculata Japanese Virgin's Bower. A beautiful vine and very hardy. Glossy green foliage and small, fragrant, white flowers, which are produced so freely in August and September that they almost hide the foliage.

35c each, \$3.50 per doz.

HONEYSUCKLE

H. Halleana Hall's Honeysuckle. Fragrant white and yellow flowers. Glossy foliage, half-evergreen in habit.

35c each, \$3.50 per doz.

H. Heckrothi An excellent and hardy variety of the honeysuckle which is nearly a continuous bloomer. Red and yellow flowers.

35c each, \$3.50 per doz.

WISTARIA

W. Chinensis Chinese Wistaria. Immense clusters of pale blue flowers and one of the most beautiful of vines. Very strong grower.

50c each, \$5.00 per doz.

Ornamental Trees

ACER

A. ginnale Siberian Maple. A small growing variety of the maple. A good tree for individual specimens or for mass planting. Foliage colors prettily in the fall.

6-8 ft, bushy. \$1.50 each.

A. platanoides Norway Maple. Without an equal for a shade tree for this section. Very symmetrical, hardy and a long lived tree. A good tree for street planting.

10 ft, 2-2½ in. trunk. \$3.00 each.

A. plat. var. Schwedleri Commonly called "red leaf maple" on account of the red or purplish color of the foliage in the habit of growth and hardiness.

6-8 ft. \$1.75 each.

AILANTHUS

A. glandulosa Tree of Heaven. A tropical appearing tree and one that will grow in many places where other trees will not thrive. A rapid grower and holds its foliage until frost.

6 ft. 75c each.

ACER PLATANOIDES Norway Maple

8-10 ft. \$.75 each. \$6.00 per doz.

10-12 ft. \$1.00 each. \$7.50 per doz.

P. nigra Lombardy Poplar. The tall, narrow habit of growth of this variety gives it a striking appearance. Much used for tall hedges or outlining drives.

8-10 ft. \$1.00 each. \$9.00 per doz.

SALISBURIA

S. adiantifolia Ginkgo or Maiden-hair Tree. A most useful and hardy tree. Withstands the unnatural conditions of cities and is almost free from insect pests. Very ornamental.

7-8 ft. \$1.25 each.

ULMUS

U. Americana American Elm. In many respects the most desirable shade tree for this section and too well known to need description.

	Stem	Each
10 ft.	1 in.	\$1.00
10-12 ft.	2-3 in.	2.00 to 4.00
12-14 ft.	3-3 1/2 in.	4.00 to 6.00
12-15 ft.	3 1/2-4 in.	7.00 to 10.00

AMERICAN ELM

Hardy Perennials

It is no less than remarkable the way this class of plants are coming into popularity. They are being planted more and more extensively each year and the results are always pleasing and obtained at a minimum of expense and labor.

A carefully selected list of perennials will afford flowers all during the summer and are especially good for cutting. In planting a perennial border it is better to plant in masses of several plants of a kind as the effect is much more pleasing than if planted singly.

A light mulching after winter sets in is of great benefit to most perennials. The size named in the descriptions indicates the height the variety usually attains at maturity. The months indicate the season of bloom.

Except where noted price of perennials is 20c each, 3 for 50c, \$1.75 per doz.

AQUILEGIA, COLUMBINE

Crysantha 18-24 May-June. Yellow.

Pkt. 5c, ¼ oz. 25c.

ASTERS

There is an almost endless variety of asters and after trying many kinds, we have selected the following two: Queen of the Market and Semple's, as best covering the aster season. From these two kinds you can have all the aster colors, have bloom from July until frost, and from the late flowering or Semple's

asters, the finest known asters for color, size and length of stem.

We advise planting some of each kind and offer three 10c pkts. for 25c post-paid.

Queen of the Market The best early aster and grown by us for cut-flowers for sale at our store. The habit of the plant is bushy and the flowers are large for early asters.

Either white or mixed colors.

Pkts. 5c and 10c, $\frac{1}{4}$ oz. 25c.

Sample's Late Branching This grand strain of asters rivals the chrysanthemums in size. The flowers are very large, of good form, and have a large range of color, in white, pink, red, lavender and purple. A nice bunch of "Sample's" is hard to beat. We grow these for our main crop.

Pink, purple, lavender, crimson, white, Daybreak (light pink) and mixed colors at the uniform price of

Pkts. 5c and 10c, $\frac{1}{4}$ oz. 20c.

Bulbs and Tuberous Rooted Plants

FOR SUMMER CULTURE

BEGONIA

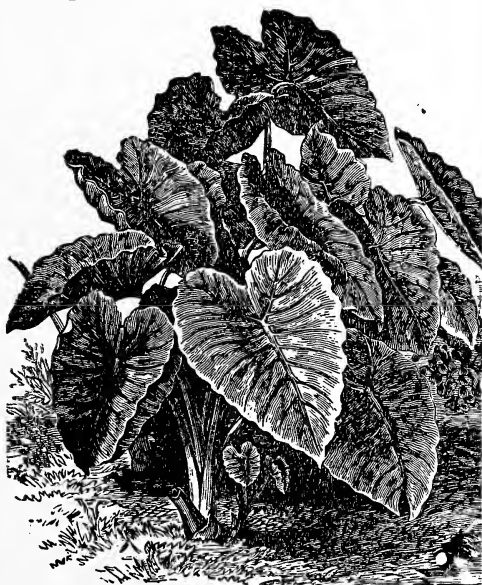

Tuberous Rooted These charming plants with their large flowers and brilliant colors lead all other summer tuberous rooted plants for a grand display of bloom. Wonderful improvement has been made in the past few years until now flowers from four to six inches in diameter are not at all uncommon. The plants are very easily cared for, wanting a good, rich soil and plenty of moisture, with some protection from the sun during the day. The bulbs can be kept year after year.

Single Scarlet, pink, white, yellow.
10c each, 4 for 25c, 75c per doz, \$5 for 100, postpaid.

Double Scarlet, pink, white, yellow.
10c each, 3 for 25c, \$1.00 per doz., \$7.50 for 100. Postpaid.

CALADIUM OR ELEPHANT'S EAR

CANNAS

These are among the most effective bedding plants on the market and are steadily increasing in popularity.

We list the following kinds, and as they are all standard varieties, no mistake can be made in selecting any of them. All will stand the full sun.

For Canna tubers see "Bulbs and Tuberous Rooted Plants."

Beaute Poitevine (3 feet) An excellent dwarf, free flowering, crimson.

Director Mr. Hob (5 ft.) A choice variety. Yellow, lightly flecked with red.

Florence Vaughan (5 ft.) This canna is perhaps better known than any other va-

riety. Flowers are bright yellow, thickly dotted with red.

King Humbert (5 ft.) This magnificent canna combines the large flowers and sturdy habit of the Italian varieties, with the dark bronze foliage, something that has heretofore not been accomplished. The flowers are a brilliant orange scarlet, striped with crimson, and measure about five inches in diameter. A king among cannas.

Mrs. Kate Gray (5 ft.) A rich orange scarlet flaked with yellow, the individual flowers measuring from four to five inches across. Truly a grand variety.

President McKinley (3 ft.) Brilliant crimson, foliage dark green edged with chocolate.

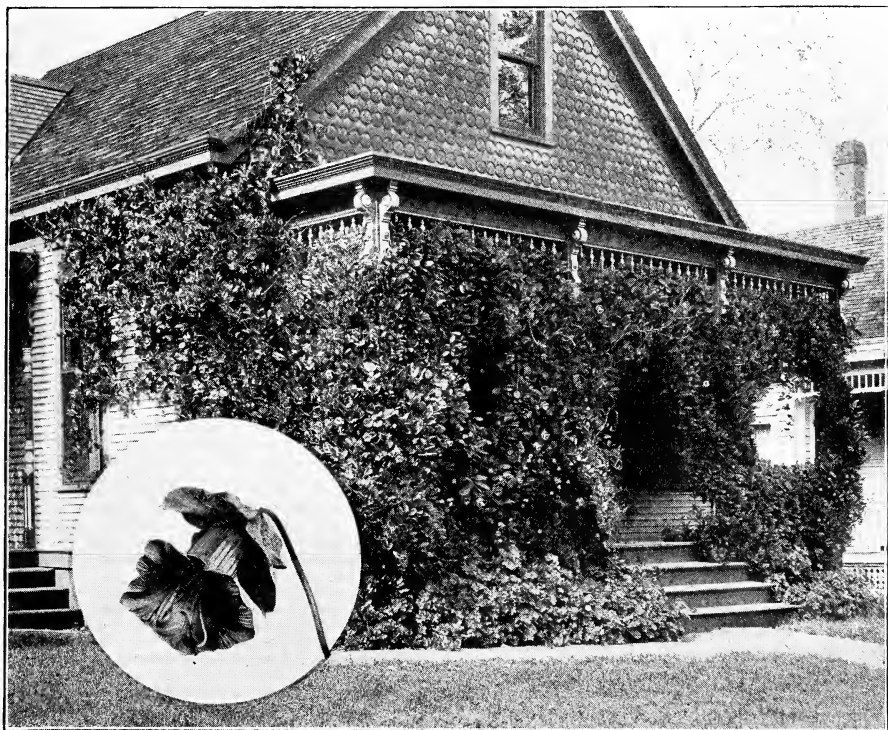

Robert Funcke (4 ft.) Dark red.

Strong plants of any of above varieties Apr.-June, 15c each, \$1.50 per doz., \$10.00 per 100.

COBEA VINE

The finest of all the annual climbers for porches. Grows 20 to 30 feet in a season. The purple, bell-shaped flowers produced in the fall are very pretty.

Roses

TEA AND HYBRID TEA VARIETIES

The introduction within the past few years of many new varieties of tea and hybrid-tea roses has given a great impetus to rose growing in this section.

These roses are known as the "monthly or ever-blooming" and flower continually from June to frost.

While not entirely hardy they will withstand most of our winters with a little protection.

HOW TO GET THE BEST RESULTS

Select a sunny location and if the soil has some clay in it all the better. Prepare the ground by thoroughly spading and pulverizing. Plant the bush roses about fifteen inches apart, firming the ground well around the roots.

Loosen up the soil between the plants at least once a week and oftener if it rains and the soil gets packed.

About the middle of June mulch the bed with strawy manure or lawn clippings to the depth of a couple of inches, putting the mulching right up around the plants.

If thoroughly mulched, the plants will need no further cultivation except to pull out the few large weeds that will appear, and give a thorough soaking every ten day or two weeks if the weather is very dry.

Late in the fall mound up the dirt around each plant and after the ground is frozen cover with three or four inches of strawy manure or litter.

In the spring remove the litter and level down the bed. Prune the plants by cutting back the strong shoots and removing the weak shoots entirely.

You will be surprised at the quantity of beautiful roses you can cut if you follow this method of caring for them.

General McArthur Red.

Helen Gould Bright Red.

BABY RAMBLER ROSES

These roses are very hardy and flower continuously during the summer. They do not require as much pruning as the Tea and Hybrid Tea class.

Baby Rambler Red.

Catherine Ziemet White.

CLIMBING ROSES

These are very hardy roses and while they have only one season of blooming they are a beautiful sight when they are in bloom.

The best time to prune these roses is shortly after their flowering season. Cutting away all the old flowering wood will induce a vigorous growth of new shoots which will provide the flowering wood for the next season.
